

Tech Mahindra Foundation visit at Surahkanya Vidyalaya

TMF higher officials visited one of the project schools Surahkanya Vidyalaya and interacted with the class X students. TMF CEO Ms Preet asked the students about their Career aspirations. Most of the students wanted to become Doctor or engineer as well as they also had their second thought of pursuing their hobby as their career. One of the students said confidently about continuously thinking about her dream careers and finally settled down to Engineer after going through the Psychometric Test. Nodal teachers and HM also interacted with Ms Preet and told about their learning from the project. Later on, Saplings were planted at the ground by the students with great enthusiasm and vigour.
